Een eenvoudig document in LaTeX

```
1  \documentclass{article}
2
3
4  \begin{document}
5
6
7
8
9
10
11
12
13 \end{document}
```

preamble: document settings go here

body: content (text and images) goes here

Een eenvoudig document in LaTeX

```
1  \documentclass{article}
2
3
4  \begin{document}
5
6  The Differential and Integral
7  Calculus, or, as it was formerly
8  called in this country,
9  the Doctrine of Fluxions, has always
10 been supposed to present remarkable
11 obstacles to the beginner.
12
13 \end{document}
```

Example text: "Elementary Illustrations of the Differential and Integral Calculus" by Augustus De Morgan

body: inhoud (tekst, plaatjes, tabellen) hier

Een eenvoudig document in LaTeX

```
1  \documentclass[a4paper,11pt]{article}
2
3
4  \begin{document}
5
6  The Differential and Integral
7  Calculus, or, as it was formerly
8  called in this country,
9  the Doctrine of Fluxions, has always
10 been supposed to present remarkable
11 obstacles to the beginner.
12
13 \end{document}
```

preamble: instellingen hier

Example text: "Elementary Illustrations of the Differential and Integral Calculus" by Augustus De Morgan

LaTeX commands

LaTeX commando's beginnen met een backslash \, gevolgd door letters of een speciaal teken: , #, %, ...
Commando's kunnen **argumenten** en **optionele argumenten** hebben.

```
\commando
```

of

```
\commando{argument}
```

or

```
\commando[optioneel argument]{argument}
```

LaTeX commands

Sommige commando's staan in de **body** van het document

- Het commando `\LaTeX` print het LaTeX logo. Dit commando staat in de **body** van het document.
- `\newpage` begint een nieuwe pagina en staat ook in de **body** van het document.
- `\textbf{text}` is een commando voor **vetgedrukte** tekst. Dit commando heeft 1 argument.
- `\sqrt[3]{y}` $\sqrt[3]{y}$ het wortelargument heeft 1 argument en 1 optioneel argument.

LaTeX commands

Andere commando's staan in de **preamble** van het document

- Met `\title` geef je het document een titel.
- `\usepackage{PACKAGE-NAAM}` laadt LaTeX code van anderen in je document. Deze code definïeert vaak nieuwe commando's of past bestaande commando's aan. Soms verandert de opmaak van je pagina ook door het laden van een package.
- `\usepackage[paper=a5paper, margin=2cm, landscape=true]{geometry}` laadt het geometry package met 3 optionele argumenten.

Whitespace

- a␣␣␣␣␣b

a b

Whitespace

- a␣␣␣␣␣b
- a\␣\␣\␣\␣\␣b

a b

a b

Whitespace

- a␣␣␣␣␣b → a b
- a\␣\␣\␣\␣b → a b
- a\quad␣b → a b

Whitespace

- `a␣␣␣␣␣b` → a b
- `a\␣\␣\␣\␣b` → a b
- `a\quad␣b` → a b
- `a\hspace␣{2cm}b` → a b

Whitespace

- `a␣␣␣␣␣b` → a b
- `a\␣\␣\␣\␣\␣b` → a b
- `a\quad␣b` → a b
- `a\hspace␣{2cm}b` → a b
- `\LaTeX␣is␣cool!` → LaTeX is cool!

Whitespace

- `a␣␣␣␣␣b` → a b
- `a\␣\␣\␣\␣b` → a b
- `a\quad␣b` → a b
- `a\hspace␣{2cm}b` → a b
- `\LaTeX␣is␣cool!` → LaTeXis cool!
- `\LaTeX␣{}␣is␣cool!` → LaTeX is cool!

Paragrafen

Een paragraaf bestaat uit enkele regels tekst. Paragrafen worden van elkaar gescheiden door **witregels**.

```
\documentclass[a4paper, 10pt]{article}
\begin{document}
The agitation for the Universal Colour Bill
continued for three years; and up to the
last moment of that period it seemed as
though Anarchy were destined to triumph.

A whole army of Polygons, who turned out
to fight as private soldiers, was utterly
annihilated by a superior force of Isosceles
Triangles --- the Squares and Pentagons
meanwhile remaining neutral.
\end{document}
```

The agitation for the Universal Colour Bill continued for three years; and up to the last moment of that period it seemed as though Anarchy were destined to triumph.

A whole army of Polygons, who turned out to fight as private soldiers, was utterly annihilated by a superior force of Isosceles Triangles — the Squares and Pentagons meanwhile remaining neutral.

Paragraphs

Standaard worden paragrafen ingesprongen. De paragrafen scheiden met een witregel in plaats van inspringing kan door het commando `\usepackage{parskip}` aan de preamble toe te voegen.

```
\documentclass[a4paper, 10pt]{article}
\usepackage{parskip}
\begin{document}
The agitation for the Universal Colour Bill
continued for three years; and up to the
last moment of that period it seemed as
though Anarchy were destined to triumph.

A whole army of Polygons, who turned out
to fight as private soldiers, was utterly
annihilated by a superior force of Isosceles
Triangles --- the Squares and Pentagons
meanwhile remaining neutral.
\end{document}
```

The agitation for the Universal Colour Bill continued for three years; and up to the last moment of that period it seemed as though Anarchy were destined to triumph.

A whole army of Polygons, who turned out to fight as private soldiers, was utterly annihilated by a superior force of Isosceles Triangles — the Squares and Pentagons meanwhile remaining neutral.

Sections

Het commando `\section{SECTIONNAME}` maakt een heading (titel, kop, tussenkopje). Deze headings worden automatisch genummerd. Andere headings zijn:

- `\subsection{}` , `\subsubsection{}` and `\paragraph{}`

```
\documentclass[a4paper]{article}
\begin{document}
\section{How I tried to teach the Theory of Three Dimensions to my
Grandson, and with what success}
I awoke rejoicing, and began to reflect on the glorious career before me.
I would go forth, methought, at once, and evangelize the whole of Flatland.
Even to Women and Soldiers should the Gospel of Three Dimensions
be proclaimed. I would begin with my Wife.
\end{document}
```

Example text: "Flatland" by Edwin A. Abbott

Title, author and date

We geven het artikel nu een titel. We gebruiken drie commando's om een **title**, **author** en **date** in te stellen. Deze commando's staan in de **preamble**.
Het commando `\maketitle` staat in de **body** van het document en bepaalt de positie van de titel.

```
\documentclass[a4paper, 12pt]{article}
\title{Elementary Illustrations of the Differential and Integral Calculus}
\author{Augustus De Morgan}
\date{November 11}
\begin{document}
\maketitle
The Differential and Integral Calculus, or, as it was formerly
called in this country, the Doctrine of Fluxions, has always
been supposed to present remarkable obstacles to the beginner.
\end{document}
```

Logische opmaak

Het is vaak beter om niet teveel van de vorige commando's gebruik te maken om de *logische opmaak* filosofie van LaTeXte volgen.

	not logisch	logisch	resultaat
vector	`\textbf{w}`	`\vec{w}`	$\vec{w}$
nadruk	`\textit{text}`	`\emph{text}`	*text*
kop	`\Large My Heading`	`\subsection{My Heading}`	My Heading
lemma	`\textsc{LEMMA 3.2}`	`\begin{mylemma}...\end{mylemma}`	LEMMA 3.2

Wiskunde

Er zijn twee manieren om wiskunde te zetten:

inline mode

The trigonometric identity is given by $\sin^2(\theta) + \cos^2(\theta) = 1$ for all θ.

display mode

The Pythagorean trigonometric identity is given by

$$\sin^2(\theta) + \cos^2(\theta) = 1 \tag{1}$$

The identity

$$1 + tan^2(\theta) = \frac{1}{cos^2\theta} \tag{2}$$

Is also called the Pythagorean trigonometric identity.

Er is maar 1 manier om wiskunde te zetten in inline mode. Maar er zijn vele **environments** om

Inline wiskunde

Tekst en symbolen tussen \(en \) worden gezien als **wiskundige symbolen**.

```
\documentclass[a5paper]{article}
\begin{document}
The trigonometric identity is
given by \( \sin^2(\theta) + \cos^2(\theta) = 1 \). This identity is also
called the Pythagorean trigonometric identity.
\end{document}
```

The trigonometric identity is given by $\sin^2(\theta) + \cos^2(\theta) = 1$. This identity is also called the Pythagorean trigonometric identity.

Wiskundepackages

De onderstaande drie packages zijn handig om wiskunde te zetten:

```
\documentclass[a4paper, 10pt]{article}
\usepackage{amsmath}
\usepackage{amssymb}
\usepackage{amsthm}
\begin{document}
\[
    ax^2 + bx + c = 0 \qquad
    \text{De algemene vorm van de kwadratische vergelijking}
\]
\end{document}
```

Met deze packages kun je tekst toevoegen aan formules, extra symbolen gebruiken zoals $\boxplus$, $\rightsquigarrow$ en $\mathbb{R}$ betere environments voor stellingen en bewijzen gebruiken.

`$ x^22 $`: x^22 | `$ x^{22} $`: x^{22}

Display mode

Er bestaan vele environmets voor wiskunde in Display mode. Vandaag bekijken we de **align** environment.

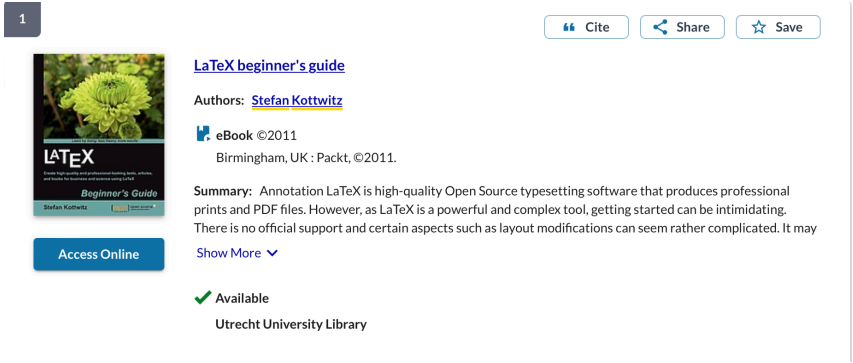
```
 The double angle formula can now be rewritten as
\begin{align}
    \cos(2\theta) &=  \cos^2\theta - sin^2\theta \\
                  &= 2\cos^2\theta - 1
\end{align}
```

The double angle formula can now be rewritten as

$$\cos(2\theta) = \cos^2\theta - sin^2\theta \tag{3}$$
$$= 2\cos^2\theta - 1 \tag{4}$$

Closing remarks

Het beste boek om meer te leren is **LaTeX Beginner's Guide** door **Stefan Kottwitz**. De eerste editie is verkrijgbaar als eBook via de uu bibliotheek.



Closing remarks

De volgende cursusavond is op maandag 3 oktober van 17:15 tot 19:00. Houdt voor de locatie onze website in de gaten.
